

## Header Data

Released On	15.02.2012 19:58:00
Release Status	Released for Customer
Component	PP-MRP Material Requirements Planning
Other Components	MM-CBP Consumption-Based Planning
Priority	Recommendations / Additional Info
Category	Consulting

---

## Symptom

You use the SAP ERP system, and you want to use your own guidelines to check your master data, and to measure and document the data quality?

## Other Terms

Master data, master data management, rules, routines, master data quality, tables, capacity leveling, MARC

## Reason and Prerequisites

You use the SAP ERP system to control materials planning. You do not exploit all the available functions. In particular, you want to improve the following areas:

- Data quality
- Monitoring internal guidelines for data creation

## Solution

In the SCM Consulting Solutions, SAP Consulting provides a number of tools for improving supply chain planning. The SAP ERP add-on tool master data monitor is an integral part of the SCM Consulting Solutions and provides the following functions:

- Definition of own rules to check the quality of the master data
- Combination of rules to create routines
- Checking the master data using routines
- Measuring the quality of the master data using key figures

You can find details and contact persons for this offer in the attachments to this SAP Note or at <http://www.sap.de/bestandsoptimierung>.

This SAP Note corresponds to Release 2012.1.

---

## Validity

This document is not restricted to a software component or software component version

---
